

## **Naseem Bibi, A Ray of Hope**

Manjo mach, a backward area, largely ultra poor people who are facing crises and have little access to resources lives here. Under PLRP, RDO helped villagers to form their own organization, Alfallah Village Organization being formed with an agenda of solving problems and sort out conflicts with in village in peaceful manner. Shabnam Rashid and Salman Javid conducted monitoring visit, VO and Peace Committee informed them that, since last six months, people have started sorting out their conflicts by their own with their assistance. In result there is not a single Fir registered against any one where as previously there is always 2/3 FIR registered from this village.

VO's success story: Naseem Bibi, member of VO whose husband is disabled, already had 6 children, had a complicated pregnancy. Pregnancy was so complicated that her 7<sup>th</sup> child was dead before her delivery. She was taken to city hospital and all the expenses were bearded by the VO affects her health. She had lost her baby and went to coma, she needed bottles of blood which of course her family could not afford so again Vo and peace committee members arranged it and female members stayed with her in hospital till she was again in her good health. It could not have been happened if VO and Peace committee didn't exist. VO and PC created an environment of togetherness which build some sensitivity among at least to begin with few of them. Such a case shows a lot of hope and prosperity among the people.
